Warrant for Town Meeting

THE STATE OF NEW HAMPSHIRE

To the Inhabitants of the Town of Amherst in the County of Hillsboro in said State, Qualified to vote in Town Affairs:

You are hereby notified to meet at Town Hall in said town on Tuesday the fourteenth day of March next, at nine of the clock in the forenoon, to act upon the following subjects:

1. To see if the town will vote to elect all town officers by ballot and not by a nomination with one ballot cast.
2. To elect one selectman for three years.
3. To choose all other town officers for the year ensuing.
4. To raise such sums of money as may be necessary to defray town charges for the ensuing year and make appropriation for the same.
5. To see if the town will vote to raise and appropriate the sum of \$300 for repairs of town hall.
6. To see if the town will vote to purchase some kind of a combination pump and chemical motor driven apparatus.
7. To see what action the town will take in building a road from the Baboosic road near C. M. Wallace's to a point near Baboosic station, also a branch road to connect this road with land of W. D. Clark, and raise and appropriate money for the same.
8. To see if the town will vote to remove boulder which obstructs view on road at Baboosic lake, and raise and appropriate money for the same.

9. To see what sum of money the town will vote to raise and appropriate for the purchase of a combination pump and chemical motor driven apparatus.

10. To see what action the town will take in regard to continuing use of snow roller.

11. To see if the town will vote to allow High School students to use Town Hall for basketball.

12. To see if the town will vote to provide a place suitable to play baseball on.

13. To see if the town will vote to build a concrete sidewalk on west side of Mont Vernon street commencing at Taylor's corner and continue to Putnam Jenkins', and raise and appropriate money for the same.

14. To see if the town will vote to provide additional street lights when the selectmen decide necessary and act in relation thereto.

Given under our hands and seal, the twenty-fifth day of February, in the year of our Lord nineteen hundred and twenty two.

PERCY M. ODELL
ERNEST H. PEASLEE
WALLACE CHILSON

Selectmen of Amherst.

Warrant for School Meeting

THE STATE OF NEW HAMPSHIRE

To the Inhabitants of the School District in the Town of Amherst qualified to vote in district affairs:

You are hereby notified to meet at the Town Hall in said district on the fourteenth day of March, 1922, at two o'clock in the afternoon, to act upon the following subjects:

1. To choose a moderator for the ensuing year.
2. To choose a clerk for the ensuing year.
3. To choose a member of the school board for the ensuing three years.
4. To choose a treasurer for the fiscal year July 1, 1922 to June 30, 1923.
5. To choose two auditors for the ensuing year.
6. To choose any other necessary officers, agents or committees.
7. To see what action the District will take in relation to reports of agents, auditors, Treasurer, School Board, Clerk and other officers.
8. To see what sum of money the District will raise and appropriate for repairs and alterations of school buildings and for new equipment for schools.
9. To see if the District will raise and appropriate the sum of \$1248.84 for the support of elementary schools for the remainder of the present fiscal year ending June 30, 1922, the same being the amount necessary to make up a \$5 tax per \$1000.00 of equalized valuation. (If this amount is raised and appropriated, state aid amounting to \$1939.23 will be paid at once.)
10. To see if the District will raise and appropriate the sum of \$9297.84 for the support of high and elemen-

tary schools and for the payment of statutory obligations superintendent's salary, and expenses of administration for the fiscal year July 1, 1922 to June 30, 1923, as set forth in the printed budget of the School Board.

· 11. To see if the District will vote to sell the No. 6 schoolhouse or take any other action in relation thereto.

12. To transact any other business that may legally come before said meeting.

Given under our hands this 25th day of February, 1922.

MELVIN W. PERRY,
PAUL N. WHITING,
GEORGE L. GOODALE,
School Board of Amherst.

From dog licenses 157 00

From tuitions 227 00

From New Boston pro-rated school tax 141 31

Mont Vernon pro-rated school tax

(Payments for several years are due)

Auction sale of Mechanic Arts equipment 206 77

Cash on hand July 1, 1921 141 85

Due from Selectmen on account of

appropriation of March, 1920 as re-

ported by School District Treasurer 678 00

Total \$11,753 48

*Since a \$5 tax on equalized valuation was not voted for the support of elementary schools at the annual School District meeting in March, 1921, no state aid will be received until such \$5 tax is voted to be available for the fiscal year, July 1, 1921, to June 30, 1922. The amount to be paid Amherst this year provided the \$5 tax is raised will be the allotment of \$2,009.02, less the adjustment balance from the 1920-1921 account of \$69.79, or a total of \$1939 23. For further explanation of this situation, see Superintendent's report.

BUDGET FOR SCHOOL YEAR, JULY 1, 1922 to JUNE 30, 1923.

(As required by Laws 1919, 106:21)

A. Amount required for support of schools:

		High	Elem.
Teachers' salaries	\$7000	\$2500	\$4500
Text books and scholars' supplies	500	100	400
Flags and appurtenances	10		10
Other expenses of instruction	40	20	20
Janitor service	504	180	324
Fuel	550	175	375
Water, light and janitors' supplies	75	15	60
Minor repairs and expenses	200	25	175
Medical inspection	125	15	110
Transportation of pupils	1200		1200
Elementary tuition	396		396
	<hr/>	<hr/>	<hr/>
	\$10600	\$3030	\$7570
Estimated income from local funds which can be applied to high school		\$1100	
		<hr/>	
Amt. to be raised and aprop'ed for H.S.	\$1930		
Amount to be raised and appropriated for support of elementary schools to secure state aid—\$5 tax on equalized valuation			\$6448 84

B. Amount required for payment of statutory obligations

Salaries of school board	150 00 °	
Salary of truant officer	25 00	
Salary of treasurer	30 00	
Salary of clerk	4 00	
Salaries of two auditors	4 00

**Of this appropriation \$625 had already been expended upon necessary repairs previous to the opening of the school year in Sept. 1920.

FREDERICK W. BROWN,
Treasurer Amherst School District.

We hereby certify that we have examined the foregoing account and find it correctly cast and properly vouched.

W. D. CLARK,

C. P. DODGE,

Auditors.

REPORT OF SUPERINTENDENT OF SCHOOLS

To the School Board of Amherst:

I herewith submit my third annual report, the same being the sixteenth in the series of such reports.

Organization of Supervisory Union No. 40

The grouping of school districts of last year has been continued and apportionment of joint expenses determined by the four school boards of the union as follows: Amherst one fourth; Brookline one sixth; Milford one half; Mont Vernon one twelfth.

Teachers and Instruction

The schools of Amherst this year are in charge of the following teachers:

Mr. Gerald H. Buker of Hampton, N. H., a graduate of Bates College with one year's experience in Pittsburg, N. H., is Headmaster of the High School. His assistants are Miss Piper and Miss Kingsley, both of whom have taught in Amherst for several years. Neither assistant gives her entire time to the High School as the Seventh and Eighth grades are taught by them also so that the real number of teachers in High School proper is two.

Grades 4, 5, and 6 are again in charge of Miss Viola Jenkins of Mont Vernon, a graduate of McCollom Institute. Miss Jenkins has taught for 15 years.

Miss Ruth W. Dearth of Plymouth teaches the first three grades. She is a graduate of Bath High School and has attended two summers at New Hampshire Normal schools. Her experience covers one year in Sunapee and two years in Lyndeborough.

The Border Street school is in charge of Miss Verna Slack of Manchester, a graduate of Amherst High School, and a teacher with two years' experience in Lyndeborough. Miss Slack has spent two summers in New Hampshire Normal schools.

Cricket Corner and Ponemah schools are taught by Miss Cevie Towne and Miss Marion Towne respectively. Both are graduates of Milford High School and have had two summers in Keene Normal school. Both are teaching their second year in Amherst.

The Greeley school has Miss Grace M. Carr of Pepperell for teacher. Miss Carr is a graduate of Pepperell High School and has attended summer school at Fitchburg Normal.

For details of enrollment consult the statistical tables at the end of this report.

A constant effort has been made for improvement in instruction and professional advancement of teachers through frequent teachers' meetings, by demonstrations in the classrooms, by visits to other schools, by attendance of teachers at educational meetings in the state, and by attendance of teachers at summer schools. All of these things are factors in making the instruction better, but no teacher can do her best work or secure the best results unless he or she is firmly supported by the parents of pupils and other citizens of the community. No person is quicker to sense the situation than the pupil himself, and it is very true that no community has better schools than the community spirit supports.

In order that school work may be properly evaluated and the fundamentals emphasized, standard tests and scales have been used this year. Spelling and writing scales are in constant use in the schoolrooms, with a very evident stimulus to the pupils. Arithmetic tests have been given, weaknesses located, and plans formulated to correct the difficulties. The great benefit of such tests and scales comes from the fact that they are based upon work actually performed by very large numbers of pupils throughout the country. Thus a standard which a pupil ought to attain is fairly and reasonably found and made available for common use.

The tools of instruction are books, apparatus, sup-

plies, and equipment in general. Like all tools, best results come when materials are of the highest quality and care of the best.

Amherst has been fortunate in the quality, variety, and quantity of its supply of text books, and but few changes or additions are needed. New American histories have been purchased within the year as the books in use were old editions and considerably worn. All geography texts are rapidly becoming out of date on account of the changes brought about by the war, and new editions should be supplied as soon as possible for pupils above Grade Three. Reading material for lower grades could be much revitalized by the addition of a few sets of newer and later books.

Supplies are much less expensive than two years ago. In anticipation of high prices a considerable stock was purchased before the prices advanced and a large saving of money resulted. The needs for next year are normal and can be filled at reasonable prices now.

Apparatus and equipment need enlargement and replacement in some particulars. The chemical laboratory does not meet the demands for an approved high school in that the apparatus and bench spaces will not accommodate the pupils for individual work. This lack of space has been criticised each time the High School has been inspected by the State Department.

Since the war our maps are quite out of date and hinder the work of teachers and pupils in all grades. New revised sets should be purchased.

Program of Study

The High School program of last year has been continued and is fully discussed in the report of Headmaster Buker, so no analysis of it will be made here.

For next year the program desired by the School Board will eliminate the Domestic Arts curriculum. This will automatically eliminate cooking and sewing for the

girls in the Seventh and Eighth grades. The plans of the School Board for returning all Seventh and Eighth grade pupils to the rural schools and rearranging the grades at the village so that one teacher shall have Grades I, II, III, and IV, and another teacher Grades V, VI, VII, and VIII, will necessitate some changes in the program for elementary schools.

The work in Grades Seven and Eight will be most affected. Although these grades are not at present organized as a Junior High School, they are separated from lower grades and have the advantages of specialized instruction. The work in elementary science will probably have to be dropped and all practical arts instruction discontinued. In their places may be put studies which educational research of recent years has shown are not best suited to pupils of the ages 12 to 14.

The work in Grades I to VI will continue to follow rather closely the 1921 edition of the program of study recommended by the State Board of Education.

In the rural schools some difficulty may be expected in securing adequately trained teachers who can successfully handle all grades. The present salaries paid to the one-room school teachers will not procure the kind of teachers needed under the new plan of organization.

Buildings

The High School building has had much better care during the last year than for some time before. Mr. Nelson, the janitor, has been interested to keep things in good order. The furnaces in the building are not in good condition because coal gas frequently leaks into the rooms through the hot air pipes, creating a very disagreeable and unhealthful condition. The difficulty should be removed even if extensive repairs are necessary.

In order to accommodate Grades 7 and 8 downstairs

next year some changes in seating are advisable and more blackboard area would be most convenient.

The toilets continue to be unsatisfactory in many ways, as toilets of the vault type are likely to be. Installation of chemical toilets, which are now a standard article on the market, would solve the problem completely. Milford put in one last fall at the Laurel school, and is entirely satisfied with it. New Boston has similarly equipped its village building, containing both grades and high school, doing away with unsightly and unsanitary earth closets.

Since the last school meeting part of the money voted for repairs and alterations has been used to replace the roofs on several unused buildings. There is about \$175 of this money left, which should be used this spring to paint the Border Street or some other school house. Needed repairs for the coming year include painting of other buildings and a new floor at the Greeley school.

Health and Recreation

Medical inspection, as required by law, has been continued, but results would be better if provision were made for follow-up work after defects have been noted. If such an arrangement could be made, parents would understand the whole situation much better, and many children would be decidedly benefited. For details see the report of the school physician, Dr. Burns.

The word recreation means more than ordinary play in our schools.. It stands for a definite program of physical exercises and games that are intended to develop the pupils individually and to instill in them something of a group pleasure and responsibility. Its greatest value seems to be in the performance of simple physical exercises regularly by all pupils, rather than the mastery of a complicated and strenuous program by a few. The teachers are to be commended for their active

interest in this important matter, especially Mr. Buker whose good work has attracted the attention and favorable comment of Mr. Morrison the high school inspector.

Attendance

Indifference or habits of delay on the part of a few families brought the attendance record down for the high school during 1920-1921 so that approval for 1921-1922 was granted only to January 31, 1922. An improvement in the record since September, especially with respect to tardiness, has resulted in an extension of the period of approval to June 30, 1922, when all approvals for the current year expire.

The per cent of attendance for the year 1920-1921 is slightly better in both high and elementary schools than a year ago and this is to be commended. The tardiness record also shows improvement, but it should be very much less, and would be if a few families would recognize the importance of prompt and regular attendance.

Transportation

The law still requires that all pupils living two miles or more from the school to which they are assigned shall be transported. The scattered school population of Amherst makes this item somewhat large. In considering the best way to arrange this matter, the advantage to the children should be the deciding factor and not the saving of a few dollars to the loss of the pupils.

It may be of interest to know that the entire amount of the proposed expenditures for transportation as presented in the budget for 1921-1922 was approved by the State Board of Education and state aid allotted accordingly. This shows that Amherst is not spending more for transportation in proportion than other districts throughout the state.

Legislation and Costs

The new school law of 1919 stands essentially as

enacted, although the legislature of 1921 made a few amendments and passed some other bills which concern schools. The most important changes are that high school tuition rebates are no longer paid by the state, that \$2000 is the maximum that the state will pay toward the salary of superintendents, that the basis of the \$5 tax which must be levied for support of elementary schools before any state aid can be received is changed from a \$5 tax on inventory to a \$5 tax on the equalized valuation; that the school fiscal year closes June 30 instead of August 31; and that school district treasurers elected at the annual meeting of the school district begin their duties on July 1 following their election.

The only change that will be discussed here is the matter of equalization, or state aid. To be eligible for state aid now a school district must vote a tax of \$5 per \$1000 of EQUALIZED valuation for "support of elementary schools." Heretofore the basis was a \$5 tax per \$1000 of INVENTORY. "Support of elementary schools" does not include expenditures for payment of statutory obligations, debt and interest, outlay for construction and equipment, cost of high school, or supervisory and administrative expenses. (For itemized details see budget in this annual report.)

Equalized valuation is the inventory plus exemptions, insurance stock, savings bank deposits, and railroad stock and property. The equalized valuation of Amherst is now \$1,288,968, as determined by the Tax Commission with corrections made for property set off into Milford School District from Amherst and for insets from Mont Vernon and New Boston.

Although the change was expected, and school districts urged to delay their meetings, the 1921 annual meeting of Amherst School District was held before the legislature had reached a vote and as a result, Amherst voted a \$5 tax on INVENTORY only for the support of elementary schools. Neither this amount nor a

\$5 tax on equalized valuation is enough to support elementary schools without state aid. Accordingly, an allotment of state aid has been made to Amherst for the present year and \$1939.23 will be paid to the District Treasurer just as soon as the difference between a \$5 tax on inventory and a \$5 tax on equalized valuation is made available for use during the present school year. This difference amounts to \$1248.84, as indicated in Article Nine of the School Warrant. In case Amherst should not wish to apply for state aid, the amount needed for support of elementary schools to finish the present school year ending June 30, 1922, without a deficit, would be about \$1600.

Approved demands upon the state for state aid for support of elementary schools have each year exceeded the amount available to meet them and the legislature of 1921 had to provide for a deficiency which had accumulated since 1919. To avoid this situation again the basis of distribution was changed so that now approved net demands of qualifying districts are met as follows:

....."If in any year the approved claims of the several districts entitled to state aid shall be in excess of the appropriation a sufficient number of districts shall be omitted from the distribution to bring the total amount of the grants within the limits of the appropriation. The eliminated districts shall be those in which payments for current local expenditures for public education, as measured in dollars and cents per one thousand dollars of equalized valuation, were, during the previous year, the lowest; except that the state board shall have authority in its discretion to withhold from such general distribution an amount not exceeding five per cent of the appropriation for state aid which it may use to furnish additional aid to districts where special need exists.....

..... The sum total of aid granted in any year to any district or to all the districts of any one town, shall not exceed \$6000."

This method of distribution of state aid is a decided improvement because now those districts which need the aid most are in general getting it, while those districts which have raised the least for all school purposes per \$1000 of equalized valuation have been the first to be eliminated. More than all, however, is the chance for many of the poorer districts to have better teachers and better facilities than ever before.

Amherst stands 75th in the list of 256 school districts in the state in the order of the amount raised and appropriated per \$1000 of equalized valuation for all school purposes and is therefore fully entitled to state aid under the terms of the law whenever a \$5 tax per \$1000 of equalized valuation is insufficient for the support of elementary schools.

Respectfully submitted,

February 25, 1922

HAROLD C. BALES.

REPORT OF HEADMASTER

To the Superintendent of Schools of Amherst:

I herewith submit my first annual report of the Amherst High School.

School opened September 6, 1921, with a total enrollment of twenty-two pupils. Fourteen of these were girls and eight were boys. Seven pupils entered the Freshman class, whereas three boys—Dwight Brown, John Ross and George Howard—graduated in June, 1921. Since the opening of school two girls have dropped out, one because her family moved from town and the other because of the illness of her mother.

The headmaster is the only change in the teaching staff. Miss Kingsley and Miss Piper are the other two members of the staff.

The course of study in the high school is divided into two distinct curricula. The Classical Curriculum maintains the following subjects: Latin, Mathematics, English, French, History and Science. The English Curriculum includes the following subjects in its program: Domestic Arts for girls, Mathematics for boys, English, French, History, Bookkeeping and Chemistry. Both curricula maintain English, French and History, a definite amount of which is required of all pupils.

Miss Kingsley teaches the Domestic Arts courses and French classes. She also teaches the third and fourth year English course.

Miss Piper besides conducting the work of the seventh and eighth grades teaches United State Constitutional History, first and second year English, and History of Civilization. in the high school program of study, four-sevenths of her time being devoted to elementary pupils.

The headmaster teaches the following subjects:

Bookkeeping and Arithmetic, Chemistry, Algebra, Geometry, first, second and third year Latin.

The first of these subjects to review is the Domestic Arts course. In this course there is maintained a full four year program. The first year class study the rudiments of needle work and learn to make, repair and renew simple garments and household linen. Also in this course simple cooking for general home living is taught. During the year the class serves 12 meals and has for guests citizens of the town. The second year course in Domestic Arts is not given this year because there are no pupils to take it.

The third and fourth year girls are combined in a class in Household Organization and Management. This course every other year alternates with the course in Physiology and Nursing. In the course in Household Management the following program is pursued. The girls make a definite and detailed study of all kinds of household appliances such as washing machines, sink drains, lighting systems, etc. They are given concrete experience with applied sciences, such as heat, light, electricity, bacteriology and chemistry. The girls in this course have drawn plans for a house and have given detailed plans for its furnishing under moderate conditions. A building contractor has inspected the plans of the entire class. This course has for its ultimate aim to make girls familiar with definite subjects related to the home in order to make home life more comfortable and pleasing at a moderate expense.

In reviewing the English course let it be stated that this is one of the most important courses in the curricula of the school and is required of all pupils for the entire four years of his or her course. This course consists chiefly of composition work, grammar, rhetoric, letter writing of all types, study of the best authors with the reading and discussion of current literature, and the teaching of the pupils to express themselves connected-

ly, at some length, on several definite subjects. It is the purpose of the teaching staff to uphold a definite English standard in the work of the entire program.

Very closely connected and an important aid to our English course are the language courses, namely: Latin and French. In the French course a two year program is at present the requirements of the curricula. All pupils of the school must complete this course before graduation. This consists of a thorough understanding of grammatical constructions with practice in writing and speaking the language. There is also a considerable reading from French authors. The Latin course is required for four years of those who elect the Classical curriculum.

In this program of study there are two history courses given this year: (1) History of Civilization, required of freshmen, (2) United States Constitutional History, required of Seniors. History of Civilization takes up the study of people from ancient times until the present date, chiefly with the idea of determining the causes and results of historical events. United States Constitutional History is required by law. Its purpose is to give the student an insight to national problems and policies and the significance of them. International relations are discussed and studied with respect to their influence on our own country. •

In the Mathematics course there are three distinct subjects: (1) Algebra; (2) Geometry; (3) Bookkeeping and arithmetic. These mathematic subjects train the pupils to do a definite piece of work accurately. Geometry especially teaches the student to be concise, clear and correct in all statements. The bookkeeping course gives the student a thorough training in the methods and practices used by the general class of business houses. Business arithmetic is carried on in conjunction with the bookkeeping.

The social life of the school has been in a progres-

sive stage. The two most important functions have been a Senior dance and a Christmas concert and social.

The Athletic program has been more or less handicapped because of no appropriate place to hold contests with rival teams. However, some advance has been made. The Athletic Association has been active in trying to secure a hall for basketball but received but little encouragement from the townspeople. An out of door ball court was used as long as the weather was suitable. A basketball team for both boys and girls was organized but before a definite schedule of games could be arranged the court was covered with snow and there was no hall in which to continue practice.

Physical exercises are a part of the daily program. A systematic drill in actual setting up exercises is given in which every pupil takes equal and active part.

The staff of the school have cooperated in the execution of the curricula in every respect.

Now after reviewing the work of the school there is left for suggestion and mention the items that would be for the future advancement and good of the school and its program. The first of these items that presents itself is that of music. Music is an art of the finest and highest variety, an art that advances people to a higher social and moral standard. Some knowledge of music is essential to a good education. Knowledge of music gives the pupil a better appreciation of values. As yet Amherst schools have not made it a part of their program. It would be a step in the advancement of education and an advantage to the schools from many standpoints if music were made a regular part of the program.

The second suggestion would be that a more suitable and more adequately equipped science laboratory be installed. At present the science department suffers greatly from lack of apparatus and equipment with which to do its work. Therefore it is only a logical suggestion that Chemistry, Physics, etc., be given a

better field for operation.

In closing the third suggestive item presents itself. It is earnestly desired by the teachers of the school that the parents and citizens of the town take a more active and constructive interest in the school. It is impossible for the townspeople to know definitely and to understand clearly what is being done in their schools unless they make personal inspections. It is fully agreed by all that the people should have a definite idea of the school work of their children. The visiting of parents and citizens gives to the pupils a special incentive and thus raises the standard of the schools to a higher level. The people of Amherst have it within their power to make its schools the best in the state.

Respectfully submitted,
GERALD H. BUKER,
Headmaster.

February, 1922.

REPORT OF MEDICAL INSPECTION

Amherst, N. H., February 24, 1922.

To the School Board of Amherst:

I submit herewith my annual report of medical inspection of schools.

The number of schools examined this year was the same as last, with a slight increase in the number of scholars.

In the statistics as compiled by Miss Smith last year it was noted that there had been many defects cared for during the previous year, and the same is noted again this year only with better results.

It is most gratifying to note that in the poorer families care of the teeth, tonsils and adenoids have received attention. In the well-to-do families the same attention has not been given, the reason for which can not be ascertained. The fact that a Parent Notice card is sent home does in no way mean that a dentist must be consulted, or that a skin specialist be called, or that a neurologist must give his advice unless the parent cares to. It is not obligatory (the advice is given for the benefit of the child and at the expense of the town.) Attention is called to the different defects so that the specialist can be called if the case demands that particular attention.

One very regrettable neglect on the part of the parent is vision, which seems to me is the one thing that requires the greatest care. In two cases that have been brought to my attention I found that great harm had been done instead of getting improvement. The eyes are important enough to receive the best medical attention that can be had; therefore glasses that are bought at the Charles William stores or Sears Roebuck can not correct vision that may be caused by some nerve disease,

kidney disease, or some other constitutional disease. Consult a specialist.

With a little more co-operation on the part of the family I feel sure that in the next period a greater improvement can be had.

Respectfully submitted,
OSCAR BURNS, M. D.
